

Story:

John played blackjack.
He lost all his money.
He went to the cashier.
The cashier gave him some chips.
He played again.
He lost some more money.
He went to the cashier.
The cashier gave him more chips.

Inference:

arg0	action	arg1	arg2	adv
DEALER	DEAL	CARD	---	TO JOHN

The meaning of the inference is *easy to understand*:

Disagree Lean toward disagree Maybe Lean toward agree Agree

☐ ☐ ☐ ☐ ☐

The inference is *plausible*:

Disagree Lean toward disagree Maybe Lean toward agree Agree

☐ ☐ ☐ ☐ ☐

The inference *demonstrates knowledge of casino* situations:

Disagree Lean toward disagree Maybe Lean toward agree Agree

☐ ☐ ☐ ☐ ☐
